### **DETAILED ACTION**

Applicant's arguments, see paper, filed 8/4/09, with respect to the rejection(s) of claim(s) 11-30 under 102(b) and 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made below. The amendment filed 8/4/09 contains data which distinguish instant process over that of Goodenough's process.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

1) The phrase "maintained at about 13 or greater" appears to be new matter. The Examiner believes that the replacement of said phrase by "in the range of about 13 to about 14" will cure this new matter issue. For example, see specifically claims 11,16 and 21.

2) The phrase "the molar ratio of sulfamic acid to bromine chloride" appears to be new matter. The Examiner believes that the replacement of said phrase by "an atom ratio of nitrogen to active bromine" will cure this new matter issue. For example, see specifically claims 12,14,17,19, 24 and 29.

3) The phrase “sulfamate stabilized halogen” appears to be new matter. See specifically claims 22-30.
